## PROFILE

My main specialty is Front End Development, especially working with Angular & Vue (Composition API) & frameworks such as Bootstrap and Foundation. Tailwind is also really great. I have an agile mindset and earned my SCRUM Master Certificate in 2011.

Specialist in development processes and lifecycles & junior in C# and PHP. Strong UX/UI skillset, implementing wireframes and documentation in Storybook.

I have worked on various development teams as a developer and have also taken on the role of Scrum Master at large companies. I am not only a strong, creative and detail-oriented developer but also skilled in facilitating multiple teams to achieve the highest software quality while fostering a thriving, safe and supportive team environment.

## EMPLOYMENT HISTORY

### Senior Web Developer, 4PS

Ede

Nov 2022 — Present

As a senior developer, I completely transformed our app's UX/UI to a beautiful modern working app. I used Bootstrap and updated Vue 2 to Vue 3 (Composition API). The state management is also completely renewed by me to Pinia. For documentation, I installed and configured Storybook.

### Frontend Developer, BTC Direct

Nijmegen

Jan 2021 — Nov 2022

Worked with both React and Vue 2 to implement all sorts of features to the cryptocurrency website and implemented a new design for the business website.

### Frontend Developer, Enrise

Amersfoort

Apr 2020 — Jan 2021

Worked on the KPN platform in a team of highly skilled developers and testers with Vue 2 and a custom frontend library for the designs and interfaces.

### Frontend Developer, Philips VitalHealth

Ede

Jan 2019 — Apr 2020

Worked on the Thuiszorg app, which helped home health care workers to work more efficiently. The app was made with custom code but based on the VitalHealth platform code.

### Front End Developer, De InternetJongens

Apeldoorn

May 2017 — Jan 2018

Worked on various projects as a frontend developer. Code was done with jQuery and Sass.

## **SCRUM Master/Frontend Developer, ACSI**

Andelst

Mar 2016 — May 2017

Scrum Master for both the online as the offline team & helped with programming when I had some time left between meetings and reports. Implemented structure in the development processes and helped the teams to strive for the best quality as well as a positive work environment.

## **Front End Developer, Zilveren Kruis (via TouchTribe)**

Leiden

Apr 2014 — Mar 2015

Worked within a team of developers, testers, designers and writers on the improvement of Zilveren Kruis products (ie, the Collectiviteitszoeker).

## **EDUCATION**

---

### **Scrum Master, Scrum Alliance**

Amsterdam

Aug 2011

### **Various Frontend Courses (Vue, Angular etc), Udemy**

Online

Aug 2004 — Aug 2024

## **SOME MORE INFORMATION ABOUT ME**

---

I am a developer who loves to work on a project or product for a long time. I don't get bored, as a matter of fact, I think working on the same code for a long time inspires my creativity & I like thinking about the architecture every day.

My main focus is delivering value to the customer & am not afraid to align features and new ideas with the Product Owner/Manager. I always think 2 or 3 steps ahead and am always willing to think about ways how features can be improved and problems can be solved.

My philosophy is making myself obsolete as a developer & delivering a future proof blue print to the rest of the team is always my objective.
