

Robine Savert

FRONTEND DEVELOPER

PROFESSIONAL PROFILE

Hello! My name is Robine Savert and I am a frontend developer from the Netherlands! I have been developing software for about 25 years, with main focus on frontend. My specialties include SCSS, HTML and Vanilla JS, but I also love learning Vue.JS, which I have been for the last 2 years. I am also a certified Scrum Master and enjoy working in a team!

- Generating team spirit
- Working solo & in a team
- Cross browser testing
- Writing documentation
- Cleaning up legacy code
- Architecture of the frontend

PROFESSIONAL WORK EXPERIENCE

DEVELOPER

gett internetbureau | Ede | 2021 – Present

I started working here in August of 2021, because I was impressed by the company's many clients. I work with Prestashop & Shopify, to bring customers the most revenue in their online endeavors. I am currently working solo on a custom theme for a big client.

FRONTEND DEVELOPER

BTC Direct | Nijmegen | 2021

At BTC Direct, I worked as a frontend developer in a small team. The tech stack was really varied and worked on the new BTC Direct website. I also helped with setting up some SDK's.

FRONTEND DEVELOPER

Enrise | Amersfoort | 2020

I worked at Enrise during the start of the pandemic, I used Vue.js the most. Our biggest client was fused with a large telecom company, so our IT team was no longer needed. I figured working at BTC Direct would be a better career opportunity for me.

FRONTEND DEVELOPER

Emendis | Veenendaal | 2019

At Emendis, I worked for Philips for about 9 months & after that I worked at the base office in Veenendaal for multiple clients. I used Angular and jQuery to build websites and apps.

Skills

Adobe Photoshop

SCSS

HTML

Javascript

Search Engine Optimization

Git

Courses

CERTIFIED SCRUM MASTER

2011

VARIOUS VUE & JS COURSES

2018-2021

GOOGLE ADWORDS

2021

Languages

Dutch (*native*)

English (*fluent*)

Interests

- Coding
- Learning new things (GraphQL!)
- Spending time with my daughter
- YouTube video creating

WORK EXPERIENCE CONTINUED

FRONTEND DEVELOPER

De InternetJongens | Apeldoorn | 2017 - 2018

I worked here as a Frontend developer, mostly used jQuery and the frontend framework that was created in house by the lead Frontend developer.

SCRUM MASTER/FRONTEND DEVELOPER

ACSI | Andelst | 2016 - 2017

ACSI has a lot of internal IT projects which needed to be managed in an efficient way, so after a couple of months as working as a frontend developer, I was asked to be the Scrum Master of both the offline and online teams. Next to being responsible for delivering quality software together with my teams, I was still also working on tickets in our sprint.

PLEASE SEE MY LINKEDIN FOR MORE INFORMATION ON MY WORK EXPERIENCE AND DON'T HESITATE TO REACH OUT :)
